Wrinkle Rescue Regimen

Our **Wrinkle Rescue Regimen**, an aesthetic medicine program meticulously designed to combat the **early signs of aging**. As we age, our skin naturally loses elasticity and moisture, leading to the formation of fine lines and wrinkles.

Dry skin can exacerbate wrinkle formation. That's why our program includes intensive **hydration** treatments to replenish and lock in **moisture**, restoring your skin's natural plumpness and vitality.

How are we going to achieve that?

1. **Patient education** to provide tools on which products to use and anti-aging strategies.
2. Seeking patient **commitment** so they can engage in the process and build **trust**.
3. **Aesthetic procedures** to help reduce the appearance of fine lines and wrinkles, providing your skin with a smoother, more even texture.

¿What are you going to receive?

- The program begins with an **initial session** with the patient to discuss their specific concerns and goals, their skin type, beneficial products, and program follow.
- **Botulinum toxin application.**
- **Platelet-rich plasma (PRP)** treatment for the face that helps improve skin hydration, texture, and overall appearance.
- **Skin boosters with Hyaluronic Acid**, that helps to hydrate the skin from within and improve its elasticity and smoothness.
- **Microneedling treatment** with Pb serum wrinkle hyaluronic complex professional for collagen stimulation and hydration
- Silk treatment with **polynucleotides** that utilizes polynucleotides, which are molecules known to stimulate cell regeneration, collagen production, and tissue repair.
- **2 IV Multivitamin sessions**, (Vitamin C + Glutathione).
